

Dear Customer

The European Parliament and the Council of the EU have adopted Directive on the restriction of use of certain hazardous substances in electrical and electronic equipment, known as RoHS Directive. According to this Directive, EastRising as a manufacturer of LCD Display, OLED Display, Touch Panel with application in electrical and electronic equipment, must guarantee to phase out the following substances from all our products that are to be put in EU or North America market since Jun-04-2015:

- Lead (Pb)
- Cadmium (Cd)
- Mercury (Hg)
- Hexavalent chromium (Cr<sup>6+</sup>)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Di(2-ethyl hexyl)-phthalate (DEHP)
- Butylbenzyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)

Our objective is to work together with you to check and validate the compliance of components and materials that we deliver to you with this Directive. Where needed, we have to fix with our supplier and find solutions that will guarantee us smooth transition to Lead free (LF) production.

Taking into account the whole supply chain and requests of our customers, EastRising switches over completely to lead free production from April 2005.

Yours faithfully,  
Tao Song  
General Manager
